Professional Summary

Software Engineer II with 4+ years of experience at Microsoft designing and delivering enterprise-scale backend, full-stack, and AI-powered applications. Strong expertise in building distributed systems with Azure, automated testing, and CI/CD, with a track record of modernizing legacy systems and building scalable, reliable production services.

Technical Skills

Languages: C#, TypeScript, PowerShell, HTML, CSS
Frameworks: .NET 8, ASP.NET Core, React, Redux, Unity
Libraries: Microsoft Graph, MSAL, MCP SDK, MSTest
Cloud & DevOps: Azure Functions, Azure Storage, Cosmos DB, Azure App Service, Azure Pipelines, Docker
Developer Tools: Git, VS Code, Visual Studio, Fiddler

Experience

Microsoft Hyderabad, India
Software Engineer II *September 2023 – Present*

- Built an MSTest end-to-end test framework for ASP.NET REST APIs and integrated it into CI/CD pipelines, saving approximately 12 engineer-hours of manual validation per release.
- Designed and implemented an Azure Service Bus driven ASP.NET background service that uses Durable Task Framework (DTF) for durable execution and retries, detecting and remediating configuration drift across 300+ resource types and processing 50,000 configuration per day for Microsoft 365 administrators.
- Led an incremental, reversible migration from local interprocess calls to REST endpoints across 2B+ daily invocations, streamlining traffic for modernization and microservice adoption.

Microsoft Hyderabad, India
Software Engineer I *June 2022 - August 2023*

- Designed and built Copilot Chat for Exchange Admin Center and piloted its private preview with 20 customers across 10 administrator workflows.
- Built the Public Folders administration experience in Exchange Admin Center end to end, developing React/Redux components and ASP.NET Core REST APIs for a feature serving 5M monthly active users.

Projects

12 Orbits | *C#, Unity 6, Netcode for GameObjects* July 2026 – August 2026

- Built a real-time multiplayer browser game using Unity and C#, with server-authoritative physics and synchronized player state.
- Designed multiplayer networking using Netcode for GameObjects and Unity Relay, supporting private rooms and up to 12 concurrent players per room.
- Integrated Microsoft Entra ID authentication using MSAL and token exchange.

Debugging Agent | *C#, MCP, ASP.NET, PowerShell, Git* February 2026 – March 2026

- Developed an AI-powered coding agent with MCP tools to autonomously modify, build, deploy, and test a legacy C# codebase in an isolated sandbox VM reducing developer workflow time from 10 minutes to 30 seconds.
- Designed MCP-based developer tools for code packaging, application deployment, and automated test execution.

Education

Indian Institute of Technology Guwahati (IIT Guwahati) Guwahati, India
B.Tech. in Computer Science and Engineering *July 2018 – June 2022*

Awards

JEE Advanced 2018: Ranked 461st among 240,000+ candidates
LeetCode: Knight-level competitive programmer - leetcode.com/ktk54x
Codeforces: Expert-rated competitive programmer - codeforces.com/profile/Tsukishima_
Advent of Code 2025: Completed all 25 days of the challenge
